THE BEGINNER'S COMPLETE TRAINING FOUNDATION

REPS. SETS. STRUCTURE. PROGRESSION.
EVERYTHING IN ONE PLACE.

P.03
REPS & SETS EXPLAINED

P.04
HOW MANY REPS FOR YOUR GOAL

P.07
YOUR FIRST 3-DAY PLAN

P.09
THE ONE-PAGE CHEAT SHEET

A NOTE FROM YOUR COACH

BEFORE YOU LIFT ANYTHING — READ THIS

**MOST BEGINNERS FAIL NOT BECAUSE THEY
LACK MOTIVATION — THEY FAIL BECAUSE
NOBODY GAVE THEM A CLEAR STARTING
POINT.**

THIS GUIDE FIXES THAT.

Inside, you'll find exactly how many reps and sets to do, how to structure your sessions, and how to keep making progress week after week — without guessing.

THE BASICS

REPS & SETS — THE FOUNDATION OF EVERY WORKOUT

If you don't understand this, nothing else will make sense.

REP

REPETITION

A **REP** (repetition) is one complete movement — one squat, one push-up, one curl.

SET

A GROUP OF REPS

A **SET** is a group of reps performed back to back before resting.

3×10

SET 1

SET 2

SET 3

REST

REST

So **3×10** means 3 sets of 10 reps.

Why it matters: the number of reps you do directly determines what your body adapts to. Change the reps, change the result.

REMEMBER

3 SETS OF 10 REPS = 3X10. SIMPLE. BUT THE NUMBER YOU PICK CHANGES EVERYTHING.

— REP RANGES

HOW MANY REPS SHOULD YOU DO?

It depends on what you want — here's the exact answer.

GOAL	REPS PER SET	SETS			
MUSCLE GROWTH 	6-12 REPS	3-4 SETS			
FAT LOSS 	12-20 REPS	3-4 SETS			
STRENGTH 	1-5 REPS	4-5 SETS			
ENDURANCE 	15-25 REPS	2-3 SETS			
GENERAL FITNESS 	8-15 REPS	3 SETS			
0 REPS	5	10	15	20	25 REPS

BEGINNERS

Start with the higher end of the rep range. Lower the reps as you get stronger.

SESSION BLUEPRINT

WHAT A PROPER WORKOUT ACTUALLY LOOKS LIKE

Most people skip the parts that matter most.

1

WARM-UP

5-10 MIN

Light cardio + dynamic stretches. **Never skip this.**

2

COMPOUND MOVEMENTS FIRST

Squats, deadlifts, bench press, rows. Big muscles, big energy.

3

ISOLATION EXERCISES AFTER

Curls, lateral raises, tricep pushdowns.

4

COOL-DOWN

5 MIN

Static stretching. Speeds up recovery.

RULE

HARDEST EXERCISE GOES FIRST. YOU HAVE THE MOST ENERGY AT THE START — USE IT ON WHAT MATTERS.

— PROGRESSIVE OVERLOAD

WHY YOU NEED TO KEEP CHALLENGING YOUR BODY

Same weight every week = zero progress.

Progressive overload means gradually increasing the demand on your muscles over time.

Without it, your body has no reason to change.

HOW TO APPLY IT AS A BEGINNER

- Add 1–2 reps before adding weight
- When you hit the top of your rep range for all sets, add 2.5–5kg
- Track every session — if you're not recording it, you're guessing

THE WEEKLY GOAL

THE GOAL EVERY WEEK: DO SLIGHTLY MORE THAN LAST WEEK. THAT'S IT.

YOUR FIRST WEEKLY SCHEDULE

A SIMPLE 3-DAY PLAN THAT ACTUALLY WORKS

For complete beginners. No equipment assumptions.

MON A FULL BODY	TUE REST OR WALK	WED B FULL BODY	THU REST OR WALK	FRI A FULL BODY	SAT ACTIVE RECOVERY	SUN FULL REST
-------------------------------------	----------------------------	-------------------------------------	----------------------------	-------------------------------------	-------------------------------	-------------------------

WORKOUT A	FULL BODY
Squat	3x10
Push-Up	3x10
Dumbbell Row	3x10
Plank	3x30sec

WORKOUT B	FULL BODY
Deadlift	3x8
Overhead Press	3x10
Lat Pulldown	3x10
Glute Bridge	3x15

NOTE

Alternate A and B each week.

COMMON BEGINNER MISTAKES

5 MISTAKES THAT KILL BEGINNER PROGRESS

You're probably making at least two of these.

01

TOO MUCH TOO SOON

6 days a week in month one = burnout or injury. Start with 3.

02

JUNK VOLUME

More sets $\neq$ more results. 10 sets of curls doesn't build more muscle than 4 quality sets.

03

NO PROGRESSION PLAN

Showing up without tracking means you'll do the same thing forever.

04

SKIPPING WARM-UPS

Cold muscles + heavy weight = injury waiting to happen.

05

COPYING ADVANCED PROGRAMS

If it's designed for someone with 3 years of training, it's not for you yet.

QUICK REFERENCE CHEAT SHEET

EVERYTHING YOU NEED — ONE PAGE

Save this. Screenshot it. Use it.

REP RANGES

01

Strength	1-5
Muscle	6-12
Fat Loss	12-20
Endurance	15-25

SET RANGES

02

Beginner	2-3 sets
Intermediate	3-4 sets
Advanced	4-5 sets

REST PERIODS

03

Heavy (1-5 reps)	3-5 min
Moderate (6-12)	60-90 sec
Light (15+)	30-60 sec

WEEKLY FREQUENCY

04

Beginner	3x/week
Intermediate	4x/week
Advanced	5-6x/week

05

PROGRESSIVE OVERLOAD RULE

HIT TOP OF REP RANGE FOR
ALL SETS

ADD 2.5-5KG NEXT
SESSION
